Contents

Volume 96 1990

Commentaries

Yanagida, M.
Higher-order chromosome structure in yeast 1

Gardiner, K.
Pulsed field gel electrophoresis and investigations into mammalian genome organization 5

Cassimeris, L., Rieder, C. L., Rupp, G. and Salmon, E. D.
Stability of microtubule attachment to metaphase kinetochores in PtK_1 cells 9

Tingström, A., Blikstad, I., Aurivillius, M. and Öbrink, B.
C-CAM (Cell-CAM 105) is an adhesive cell surface glycoprotein with homophilic binding properties 17

Bloodgood, R. A. and Salomonsky, N. L.
Calcium influx regulates antibody-induced glycoprotein movements within the *Chlamydomonas* flagellar membrane 27

Warn, R. M. and Robert-Nicoud, M.
F-actin organization during the cellularization of the *Drosophila* embryo as revealed with a confocal laser scanning microscope 35

Nielsen, E. H.
A filamentous network surrounding secretory granules from mast cells 43

Hush, J. M., Hawes, C. R. and Overall, R. L.
Interphase microtubule re-orientation predicts a new cell polarity in wounded pea roots 47

Anastasi, A., Hunt, C. and Stebbings, H.
Isolation of microtubule motors from an insect ovarian system: characterization using a novel motility substratum 63

Alfa, C. E. and Hyams, J. S.
Distribution of tubulin and actin through the cell division cycle of the fission yeast *Schizosaccharomyces japonicus* var. *versatilis*: a comparison with *Schizosaccharomyces pombe* 71

Novak, B. and Mitchison, J. M.
CO_2 production after induction synchrony of the fission yeast *Schizosaccharomyces pombe*: the origin and nature of entrainment 79

Waseem, A. and Palfrey, H. C.
Identification and protein kinase C-dependent phosphorylation of α-adducin in human fibroblasts 93

Keller, H. U., Niggli, V., Zimmermann, A. and Portmann, R.
The protein kinase C inhibitor H-7 activates human neutrophils: effect on shape, actin polymerization, fluid pinocytosis and locomotion 99

Fields, A. P., Tyler, G., Kraft, A. S. and May, W. S.
Role of nuclear protein kinase C in the mitogenic response to platelet-derived growth factor 107

DiLorenzo, T. P. and Steinberg, B. M.
Laryngeal keratinocytes show variable inhibition of replication by TGF-β 115

Waseem, N. H. and Lane, D. P.
Monoclonal antibody analysis of the proliferating cell nuclear antigen (PCNA). Structural conservation and the detection of a nucleolar form 121

Douglas, G. C. and King, B. F.
Differentiation of human trophoblast cells *in vitro* as revealed by immunocytochemical staining of desmoplakin and nuclei 131

Wilson, J. M., Fasel, N. and Kraehanbuhl, J.-P.
Polarity of endogenous and exogenous glycosyl-phosphatidylinositol-anchored membrane proteins in Madin-Darby canine kidney cells 143

Pavan, A., Mancini, P., Lucania, G., Frati, L., Torrisi, M. R. and Pinto da Silva, P.
High-resolution surface views of human lymphocytes during capping of CD4 and HLA antigens as revealed by immunogold fracture-flip 151

Canfield, A. E., Allen, T. D., Grant, M. E., Schor, S. L. and Schor, A. M.
Modulation of extracellular matrix biosynthesis by bovine retinal pericytes *in vitro*: effects of the substratum and cell density 159

Bereiter-Hahn, J., Lück, M., Miebach, T., Stelzer, U. and Voth, M.
Spreading of trypsinized cells: cytoskeletal dynamics and energy requirements 171

Commentaries

Cook, P. R.
How mobile are active RNA polymerases? 189

Heldin, C.-H. and Westermark, B.
Signal transduction by the receptors for platelet-derived growth factor 193

Guo, M., Toda, K.-I. and Grinnell, F.
Activation of human keratinocyte migration on type I collagen and fibronectin 197

Sonnenberg, A., Linders, C. J. T., Daams, J. H. and Kennel, S. J.
The $\alpha 6\beta 1$ (VLA-6) and $\alpha 6\beta 4$ protein complexes: tissue distribution and biochemical properties 207

Reichert, W. M. and Truskey, G. A.
Total internal reflection fluorescence (TIRF) microscopy. I. Modelling cell contact region fluorescence 219

Meyer, R., Malewicz, B., Baumann, W. J. and Johnson, R. G.
Increased gap junction assembly between cultured cells upon cholesterol supplementation 231

Parrish, E. P., Marston, J. E., Mattey, D. L., Measures, H. R., Venning, R. and Garrod, D. R.
Size heterogeneity, phosphorylation and transmembrane organisation of desmosomal glycoproteins 2 and 3 (desmocollins) in MDCK cells 239

Webster, P., Russo, D. C. W. and Black, S. J.
The interaction of *Trypanosoma brucei* with antibodies to variant surface glycoproteins 249

Jackson, C. J., Garbett, P. K., Nissen, B. and Schrieber, L.
Binding of human endothelium to *Ulex europaeus* I-coated Dynabeads: application to the isolation of microvascular endothelium 257

Ketis, N. V. and Lawler, J.
Effects of thrombospondin antibody on the recovery of endothelial cells from hyperthermia 263

Gray, A. J., Reeves, J. T., Harrison, N. K., Winlove, P. and Laurent, G. J.
Growth factors for human fibroblasts in the solute remaining after clot formation 271

Kanbe, T., Hiraoka, Y., Tanaka, K. and Yanagida, M.
The transition of cells of the fission yeast β-tubulin mutant *nda3-311* as seen by freeze-substitution electron microscopy. Requirement of functional tubulin for spindle pole body duplication 275

Holley, M. C. and Ashmore, J. F.
Spectrin, actin and the structure of the cortical lattice in mammalian cochlear outer hair cells 283

Honts, J. E. and Williams, N. E.
Tetrins: polypeptides that form bundled filaments in *Tetrahymena* 293

Delhanty, P. and Locke, M.
Cycles of F-actin redistribution in the dermal glands of an insect relate to secretion 303

Jackson, R. C. and Modern, P. A.
N-ethylmaleimide-sensitive protein(s) involved in cortical exocytosis in the sea urchin egg: localization to both cortical vesicles and plasma membrane 313

McCann, M. C., Wells, B. and Roberts, K.
Direct visualization of cross-links in the primary plant cell wall 323

Turner, B. M., Franchi, L. and Wallace, H.
Islands acetylated histone H4 in polytene chromosomes and their relationship to chromatin packaging and transcriptional activity 335

Commentaries

Harrison, A. and Hyams, J. S.
Mapping MAP-2 347

Flügge, U.-I.
Import of proteins into chloroplasts 351

Review

Hepler, P. K., Palevitz, B. A., Lancelle, S. A., McCauley, M. M. and Lichtscheidl, I.
Cortical endoplasmic reticulum in plants 355

Schweitzer, E. S. and Paddock, S.
Localization of human growth hormone to a sub-set of cytoplasmic vesicles in transfected PC12 cells 375

Solnica-Krezel, L., Diggins-Gilicinski, M., Burland, T. G. and Dove, W. F.
Variable pathways for developmental changes in composition and organization of microtubules in *Physarum polycephalum* 383

Martindale, V. E. and Salisbury, J. L.
Phosphorylation of algal centrin is rapidly responsive to changes in the external milieu 395

Debec, A., Courgeon, A.-M., Maingourd, M. and Maisonhaute, C.
The response of the centrosome to heat shock and related stresses in a *Drosophila* cell line 403

Haass, C., Klein, U. and Kloetzel, P.-M.
Developmental expression of *Drosophila melanogaster* small heat-shock proteins 413

Arrigo, A.-P.
The monovalent ionophore monensin maintains the nuclear localization of the human stress protein hsp28 during heat shock recovery 419

Novak, B. and Mitchison, J. M.
Changes in the rate of oxygen consumption in synchronous cultures of the fission yeast *Schizosaccharomyces pombe* 429

Creanor, J. and Mitchison, J. M.
Continued DNA synthesis after a mitotic block in the double mutant *cut1 cdc11* of the fission yeast *Schizosaccharomyces pombe* 433

Cardenas, M. E., Laroche, T. and Gasser, S. M.
The composition and morphology of yeast nuclear scaffolds 437

Karwan, R. M., Laroche, T., Wintersberger, U., Gasser, S. M. and Binder, M.
Ribonuclease H(70) is a component of the yeast nuclear scaffold 449

Zlatanova, J. S., Srebreva, L. N., Banchev, T. B., Tasheva, B. T. and Tsanev, R. G.
Cytoplasmic pool of histone H1 in mammalian cells 459

Allen, R. D., Ueno, M. S., Pollard, L. W. and Fok, A. K.
Monoclonal antibody study of the decorated spongiome of contractile vacuole complexes of *Paramecium* 467

Fujimoto, T. and Ogawa, K.
Fodrin in the human polymorphonuclear leucocyte: redistribution induced by the chemotactic peptide 475

Souto-Padrón, T., Campetella, O. E., Cazzulo, J. J. and de Souza, W.
Cysteine proteinase in *Trypanosoma cruzi*: immunocytochemical localization and involvement in parasite–host cell interaction 483

Ebert, D. L., Jordan, K. B. and Dimond, R. L.
Lysosomal enzyme secretory mutants of *Dictyostelium discoideum* 489

Hassell, T. and Butler, M.
Adaptation to non-ammoniagenic medium and selective substrate feeding lead to enhanced yields in animal cell cultures 499

Chopra, D. P., Sullivan, J. K. and Reece-Kooyer, S.
Regulation by calcium of proliferation and morphology of normal human tracheobronchial epithelial cell cultures 507

Joseph, L. B., Kreutzer, D. L. and Tanzer, M. L.
Characterization of Chinese hamster ovary cells with impaired spreading properties on fibronectin 517

Bee, J. A. and von der Mark, K.
An analysis of chick limb bud intercellular adhesion underlying the establishment of cartilage aggregates in suspension culture 525

Skaer, H. le B., Harrison, J. B. and Maddrell, S. H. P.
Physiological and structural maturation of a polarised epithelium: the Malpighian tubules of a blood-sucking insect, *Rhodnius prolixus* 535

McNeil, P. L. and Ito, S.
Molecular traffic through plasma membrane disruptions of cells *in vivo* 547

Commentaries
Knox, P.
Emerging patterns of organization at the plant cell surface 557

Locke, M.
Is there somatic inheritance of intracellular patterns? 563

Book Reviews 569

Simon, J. R. and Salmon, E. D.
The structure of microtubule ends during the elongation and shortening phases of dynamic instability examined by negative-stain electron microscopy 571

Veenhuis, M. and Goodman, J. M.
Peroxisomal assembly: membrane proliferation precedes the induction of the abundant matrix proteins in the methylotrophic yeast *Candida boidinii* 583

Harfst, E., Severs, N. J. and Green, C. R.
Cardiac myocyte gap junctions: evidence for a major connexon protein with an apparent relative molecular mass of 70 000 591

Gonzalez, C., Saunders, R. D. C., Casal, J., Molina, I., Carmena, M., Ripoll, P. and Glover, D. M.
Mutations at the *asp* locus of *Drosophila* lead to multiple free centrosomes in syncytial embryos, but restrict centrosome duplication in larval neuroblasts 605

Jerka-Dziadosz, M.
Domain-specific changes of ciliary striated rootlets during the cell cycle in the hypotrich ciliate *Paraurostyla weissei* 617

Okamoto-Inoue, M., Taniguchi, S., Sadano, H., Kawano, T., Kimura, G., Gabbiani, G. and Baba, T.
Alteration in expression of smooth muscle α-actin associated with transformation of rat 3Y1 cells 631

Rosen, E. M., Meromsky, L., Goldberg, I., Bhargava, M. and Setter, E.
Studies on the mechanism of scatter factor. Effects of agents that modulate intracellular signal transduction, macromolecule synthesis and cytoskeleton assembly 639

Kurpakus, M. A., Stock, E. L. and Jones, J. C. R.
Analysis of wound healing in an *in vitro* model: early appearance of laminin and a $125\times10\,M_r$ polypeptide during adhesion complex formation 651

Darcy, P. K. and Fisher, P. R.
Pharmacological evidence for a role for cyclic AMP signalling in *Dictyostelium discoideum* slug behaviour 661

Kesbeke, F., Van Haastert, P. J. M., De Wit, R. J. W. and Snaar-Jagalska, B. E.
Chemotaxis to cyclic AMP and folic acid is mediated by different G proteins in *Dictyostelium discoideum* 669

Jenkins, J. R., Pocklington, M. J. and Orr, E.
The F_1 ATP synthetase β-subunit: a major yeast novobiocin binding protein 675

Ducommun, B., Tollon, Y., Garès, M., Beach, D. and Wright, M.
Cell cycle regulation of $p34^{cdc2}$ kinase activity in *Physarum polycephalum* 683

Griffiths, G., Hollinshead, R., Hemmings, B. A. and Nigg, E. A.
Ultrastructural localization of the regulatory (RII) subunit of cyclic AMP-dependent protein kinase to subcellular compartments active in endocytosis and recycling of membrane receptors 691

Brummell, D. A., Camirand, A. and Maclachlan, G. A.
Differential distribution of xyloglucan glycosyl transferases in pea Golgi dictyosomes and secretory vesicles 705

Scheel, J., Matteoni, R., Ludwig, T., Hoflack, B. and Kreis, T. E.
Microtubule depolymerization inhibits transport of cathepsin D from the Golgi apparatus to lysosomes 711

Cole, L., Coleman, J., Evans, D. and Hawes, C.
Internalisation of fluorescein isothiocyanate and fluorescein isothiocyanate–dextran by suspension-cultured plant cells 721

Davies, J. M., Brownlee, C. and Jennings, D. H.
Measurement of intracellular pH in fungal hyphae using BCECF and digital imaging microscopy: evidence for a primary proton pump in the plasmalemma of a marine fungus 731

Moser, R., Groscurth, P. and Fehr, J.
Promotion of transendothelial neutrophil passage by human thrombin 737

Bellvé, A. R., Chandrika, R. and Barth, A.
Temporal expression, polar distribution and transition of an epitope domain in the perinuclear theca during mouse spermatogenesis 745
